

Acceptable RS Qualifications

This qualifications list is for proposed QS's who have never been a QS for this scheme before, or not been a QS within 2 years of application. This ensures you have the right qualifications required to join this scheme. The qualifications below are taken from the June 2025 EAS Qualifications Guide.

Qualifications referenced in the tables below may be evidenced by providing valid ECS card information (either ECS card number, image) and ECS CPD record, which can be freely verified using the ECS Check systems or CSCS Smart Check App. An ECS Registered Electrician Gold Card with the occupation of Installation Electrician, which will show the relevant version of BS 7671, should typically be sufficient to demonstrate compliance with the qualification requirements in the table below.

An ECS Card with occupation of Maintenance Electrician may be suitable if the underpinning qualifications align with the requirements of the tables below.

Where an ECS card is or has been held, ECS can verify if an individual's qualifications are sufficient when qualification certificates are inaccessible or unavailable.

NOTE - LCL Awards is a trading name of Logic Certification, qualifications may have been previously issued in this name.

¹ Qualifications issued after 1st January 2026 will not be accepted as this qualification will no longer be recognised as a current qualification. Applicants who achieved this qualification before 1st January 2026 will be accepted.

*Formal training programmes prior to 1994 will probably have followed an apprenticeship training programme. If this is the case, the final Apprenticeship Completion Certificate, Deeds or Diploma can be provided in lieu of the FICA, AM, AM1 or AM2. Applicants may also present more recent apprenticeship completion certificates from various issuing authorities without evidence of the underpinning technical qualifications or end point assessment certification. In these circumstances, the Certification or Registration Body must present each individual applicant details to The Electrotechnical Skills Partnership for verification against historical records. A formal decision notice will be issued.

Pre 1995 AM2 was issued in Scotland. From the summer of 1995 FICA was introduced, therefore AM2 is acceptable for qualifications issued before this time.

Proposed EI must also hold one of these Wiring Regulations Qualifications
